

QUAY CRANE (QC2) SCHEDULED MAINTENANCE

Dear Shipping Line Partners,

Please be advised that **Quay Crane 2 (QC02)** will undergo an **18-day scheduled maintenance period from November 1 to 18, 2026**, to facilitate essential equipment works.

The maintenance will include the **replacement of the QC02 elevator and festoon system**, along with other preventive maintenance activities, to ensure the crane's continued **safety, reliability, and operational readiness**.

To maintain service continuity and minimize operational disruption during this period, a **Mobile Harbor Crane (MHC)** will be deployed to support the vessel operations and maintain terminal efficiency.

These proactive improvements form part of our ongoing commitment to maintaining safe, reliable, and efficient terminal operations for our customers and partners.

We appreciate your patience, understanding, and continued support as we carry out these necessary maintenance activities.

Thank you,
MCT Management
